Children's home in Pokhara, Nepal

Donations received:

MSOffice 2007

Encarta Premium 2009

Communicator 2007

Visio 2007

Result:

Improved communication support

Stichting Youth in Nepal (sYin) is co-founder of a children's home in Pokhara, Nepal, which cares for 30 child victims of war – children who have lost their fathers in the recent civil conflict. Their mothers have insufficient resources to take good care of their children, now that the fathers are no longer there to provide an income. The children's home is fully run by a Nepalese organization and Nepalese staff, often assisted by Dutch volunteers. sYin provides the home with financial support and assists with local organization; in both word and deed.

sYin has received TechSoup support, including Microsoft Office software. The donations such as MS Word and Outlook make it possible to maintain efficient communications. Thanks to this support, sYin does not have to spend scarce resources on software but can use them for the children's home in Nepal.
